About Me

I am a second-year student in Software Engineering with a strong interest in data-driven decision making. I enjoy combining programming and mathematics to solve practical problems. My goal is to start a career in Data Science and Machine Learning.

Skills and Abilities

- **Discrete Mathematics**
- **Mathematical Analysis**
- **Python (numpy, pandas, seaborn, matplotlib)**
- **SQL**
- **Git**
- **Basic Machine Learning**

Projects

- **House price prediction using regression models**
- **Analysis of social media engagement data**
- **Data preprocessing and feature engineering for ML models**
- **Sentiment analysis of product reviews**

Education

- ***(2022–2026) American University of Central Asia
Software Engineering***
- ***(2023) Introduction to Machine Learning (Udemy)***
